Subject: Microsoft Settlement

This settlement is now the only way to keep peace in this complicated market, please leave Microsoft the right to innovate! The Information Technology Market is a Trillion Dollar Market every year in the world, Microsoft count only for 30 billion, even if you think Microsoft is a Monopoly let this happen, you must to interven only when this monopoly don't innovate more, you may see innovation walking from monopoly to monopoly, from a company to another one... when the innovation is done and the market steady, and only when and if you will see monopoly you will have my consensus to fight the monopoly! Thanks to read me, Alessandro Simonini, Ferrara, Italy.
